

```
import { Injectable } from '@angular/core';
import { Router, CanActivate, ActivatedRouteSnapshot, RouterStateSnapshot } from
 '@angular/router';

import { AccountService } from '@app/_services';

@Injectable({ providedIn: 'root' })
export class AuthGuard implements CanActivate {
  constructor(
    private router: Router,
    private accountService: AccountService
  ) {}

  canActivate(route: ActivatedRouteSnapshot, state: RouterStateSnapshot) {
    const user = this.accountService.userValue;
    if (user) {
      // authorised so return true
      return true;
    }

    // not logged in so redirect to login page with the return url
    this.router.navigate(['/account/login'], { queryParams: { returnUrl:
state.url } });
    return false;
  }
}
```
